# DAIDS Clinical Site Monitoring (CSM) System Training Announcement

What new courses are being offered?

The DAIDS Learning Portal now offers a new course introducing the DAIDS CSM System.

- With eight modules exploring many facets of the CSM system, this training enables users at all levels to explore their role in the CSM system.
- While the course takes on average 1 hour to complete, the modules are designed to be completed in a self-paced fashion.
  Note: This course is required by DAIDS.

Who should complete the CSM System training?

This CSM System training is designed for two types of learner:

- New users to the CSM System, including:
  (CRS Leaders, CRS Coordinators, Pharmacist of Record (PoR) / Site Pharmacist)
- Other site staff that will use the CSM System but who do not have access yet
  Note: This training is required to ensure that new users understand how to use the DAIDS CSM System.
- Existing users who would like a refresher of the CSM system

How do I access this Course?

- If you have a DAIDS Learning Portal account already, simply sign in to the system and visit the course at: https://www.daidslearningportal.com/
  Keyword search in DAIDS LMS: **CSM**
- If you do not have yet a DAIDS Learning Portal account, visit the site and click on **Register** to request an account. Once you have completed the process, you will be able to access the CSM training.
- For additional information on this course or other training assistance, please contact the DAIDS Training Support Team at daidscrss-support@westat.com
